1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Replace the abstract with the following:

- - An electronic fund transfer (EFT) system capable of displaying a menu including one or more user-defined custom transactions associated with an identification card so that the user can select a desired transaction by a single selection or with limited inputs. An asset of an ATM system and method is a graphical user interface that enables a user to select a transaction type and the transaction parameters necessary to define that transaction from a single display. By use of a pointing device, the user can select or change selections for the transaction type and/or transaction parameters. Preferably, the display is created using object-oriented programming and has a plurality of objects corresponding to the transaction type and transaction parameters. Using the pointing device, the user selects the transaction type. --

2. The above amendment was necessary to make the abstract compliant with MPEP 608.01(b).

3. Also attached, please find applicant's copy of the initialed and signed IDS of June 26, 2004. All references thereon have been considered.
